

# Fruits & Vegetables

*Eat Healthy*

In the city, we work until quitting time. On the farm, we work until the job is finished.

LUX Fruits and Vegetables was founded in where it initially started off as a small family business with the main purpose of collecting, cultivating and exporting fruits and vegetables. With valuable experience gained over the years in export, wholesale and retail, LUX Fruits and Vegetables has created a strong reputation in the Albanian, Kosovo and North Macedonian markets. Now, LUX Fruits and Vegetables is a leading company in Albania, Kosovo, and North Macedonian markets for the export of fruits and vegetables.

# About Us

We cultivate the best products

# Our mission

## **Mission**

Our mission is being one with nature, health and good living. We aim to provide responsible and high quality products. Therefore, we strive for sustainable growth offering nutritious and healthy food at affordable prices in the region but also on a global scale.

## **Vision**

The vision is based on the slogan “From Nature To Life” while serving to its’ consumers in their nearest places with the main purpose of saving customer’s time and providing customers on day to day with the most nutritious choices in a wide range of best quality and healthy food.

# Products

**Our main products cultivated are at highest quality and are available almost all year round. The good climate and land has made suitable for cultivating the best quality of fresh fruits and vegetables.**

In July 2019 we received the Global G.A.P certificate for 5 products: tomato, cucumber, peppers, watermelon and melon. The process continued uninterrupted and in April 2020 it was joined our portfolio also 3 other certified products: pumpkin, tangerine and leeks.

Our expertise over the years has improved the work our professional team with all the know how in all activities from sowing to harvesting of crops.

*The main cultivated fruits and vegetables are:*
